

Russian River Environmental Forum Presents:

SANTA ROSA'S PIPE SCHEMES

OUR WASTEWATER NIGHTMARES

Saturday, May 31, 2003

9am-noon • Raven Theater • Healdsburg

A fast paced program featuring scientists and experts who will unravel Santa Rosa's Draft EIR with positive solutions:

Increased Water Conservation • Wet Weather Inflow Reduction
Increased Urban Reuse • Redwood Forest & Agricultural Reuse

No River Dumping • No Mixing Zones • No Toxic Discharges into the Water Supply
No Wastewater Reservoirs on Salmon Streams & Creeks

An in-depth examination of the world's largest sewage disposal scheme planned for the Healdsburg/Russian River ecological paradise.

"This is the single largest issue facing our watershed. Stand up and voice your concerns before it's too late and 6.4 billion gallons of wastewater is dumped in the Russian River above Healdsburg." – Don McEnhill, Russian Riverkeeper

Raven Theater, 115 North Street, Healdsburg • Doors Open at 8:30am
Suggested Donation \$5 • No Pre-Event Reservations!
